COTTON VARIETIES PLANTED

1998 CROP

UNITED STATES DEPARTMENT OF AGRICULTURE
Agricultural Marketing Service - Cotton Programs
Memphis, Tennessee

August 1998

Cotton Varieties Planted, United States
1998 Crop

Deltapine brand upland cottonseed was the most popular planted in the United States for the 1998-99 season, according to the USDA, Agricultural Marketing Service's Cotton Programs. Paymaster brand was the second most popular followed by Stoneville, Sure-Grow, CPCSD, All-Tex and Tamcot. Transgenic varieties accounted for about 45 percent of plantings.

Deltapine brand varieties were the most popular planted in 1998, accounting for 39.4 percent of the United States acreage. This brand accounted for 60.7 percent of the acreage planted in the southeastern states (Alabama, Florida, Georgia, North Carolina, South Carolina and Virginia). It accounted for 39.1 percent of the acreage planted in the south central states (Arkansas, Louisiana, Mississippi, Missouri and Tennessee), 25.9 percent of the acreage planted in the southwestern states (Oklahoma and Texas) and 29.8 percent in the western states (Arizona, California and New Mexico). Deltapine's most popular variety was Deltapine NuCotn 33B. This variety accounted for 8.8 percent of the United States acreage planted.

Paymaster brand varieties were the second most popular planted in 1998, accounting for 26.8 percent of the United States acreage. These varieties accounted for 53.1 percent of the acreage planted in the southwestern states, 17.3 percent in the southeastern states and 8.7 percent in the south central states. The most popular Paymaster variety was Paymaster HS 26, accounting for 5.7 percent of the U.S. acreage followed by Paymaster PM 2326 RR with 4.7, and Paymaster PM 2200 RR with 3.4 percent of the acreage.

Stoneville varieties were the third most popular planted in 1998. These varieties accounted for 16.2 percent of the acreage planted. They accounted for 10.0 percent of the acreage planted in the southeastern states, 44.1 percent of the acreage in the south central states, 4.5 percent in the southwestern states and 1.5 percent in the western states. The most popular Stoneville variety was Stoneville ST 474 which accounted for 6.2 percent of the United States acreage planted. The second most popular variety was Stoneville BXN 47 which accounted for 5.7 percent of the U.S. acreage.

Sure-Grow varieties were the fourth most popular planted in 1998. These varieties accounted for 5.2 percent of the U.S. acreage and accounted for 8.6 percent of the southeastern states planted acreage, 7.6 percent in the south central states, 0.9 percent in the southwestern states, and 5.7 percent in the western states.

CPCSD (California Planting Cotton Seed Distributors) varieties were the next most popular and accounted for 4.6 percent of the U.S. acreage planted in 1998. CPCSD varieties were the most popular planted in the western states, accounting for 52.0 percent of that acreage. Acala Maxxa was the most popular variety of CPCSD planted and accounted for about 3.6 percent of the U.S. acreage.

Transgenic varieties, genetically engineered varieties resistant to worms,

herbicides or both, accounted for about 45.2 percent of the upland cotton planted in the United States in 1998.

Pima S-7 was the most popular American Pima variety planted in 1998. This variety accounted for 61.9 percent of the United States acreage and was the most popular variety planted in Arizona and California. Deltapine DP HTO was the second most popular American Pima variety and accounted for 10.8 percent of the U.S. crop. Pima S-6 was the next most popular variety planted in New Mexico and Texas and accounted for 10.8 percent of the U.S. crop. Germain's CH 252 accounted for 10.7 percent of the U.S. acreage.

Estimates of the percentage of the various varieties of cotton planted in the United States for 1998 are based on informal surveys made by the Cotton Program Classing Offices. The variety data are based on estimates furnished by cotton ginnerers for the territories served by their gins, seed dealers, extension agents, and others.

Estimated percentage of upland cotton planted to leading specified varieties, by growth areas, 1998 crop
